**Bring your checkbook** – there will be loads of raffle opportunities and great auction items!

**What is HD?** It is a hereditary genetic disease that typically begins in the prime of life and slowly destroys a person's ability to walk, talk, reason and care for themselves. It affects as many people as muscular dystrophy, but many people have never heard of it. Won't you help?

Prize donations will be listed in program and will be recognized during dinner. All proceeds will go to the local HDSA Chapter to further research to find a cure for this disease as well as help other local families. **Prize donations and sponsorships are important and appreciated, if you can help, please let us know!!** Sponsorship opportunities are noted on the registration form. **Corporate sponsorship opportunities are also available.**
